### **DETAILED ACTION**

Claims 1-13 are pending in the instant application. Acknowledgement is made of Applicant's declaration, filed 10/01/01.

#### ***Claim Rejections - 35 USC § 112***

1. Claim 13 provides for the use of a dianhydrogalactitol, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

Claim 13 is rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd. v. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

#### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Art Unit: 1616

2. Claims 1, 4-11 are rejected under 35 U.S.C. 102(e) as being anticipated by Barnett et al. (U.S. Pat. No. 6,103,487).

Barnett teaches methods of treating cancer. Methods can include using aqueous suspensions, wherein such suspensions can contain excipients such as hexitol anhydrides (col. 9, lines 65-66). The suspensions can further contain a cancer therapeutic agent such as cisplatin (col. 13, line 24).

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Francis (U.S. Pat. No. 4,797,388) further in view of Levin et al. ("Chemotherapeutic approaches to brain tumors. Experimental observations with dianhydrogalactitol and dibromodulcitol").

Francis teaches a pharmaceutical composition containing galactitol as a carrier for a therapeutic agent. The agent may be any substance which is anti-tumor, such as cisplatin (col. 3, lines 4-16). It is taught that galactitol enhances the chemical and physical stability of the drug and allows faster reconstitution (Abstract).

Art Unit: 1616

Levin et al. teaches the effect of dianhydrogalactitol on cell death as it relates to brain tumors. Levin further teaches that the antitumor activity of the hexitol epoxides may be enhanced by drug combination activity.

Based on the art available at the time the invention was made, one with ordinary skill in the art would have been motivated to combine cisplatin with a hexitol epoxide such as dianhydrogalactitol in order to enhance the activity of the dianhydrogalactitol.

***Election/Restrictions***

4. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-10, drawn to a method of treatment, classified in class 424, subclass 140.1.
  - II. Claims 11-13, drawn to a composition, classified in class 524, subclass 753.

The inventions are distinct, each from the other because:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the process can be practiced with another materially different product, such as a composition consisting of dianhydrogalactitol and cisplatin.

Art Unit: 1616

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
